## **Overseeders**

## **OS15 Series**

2" or 3" Spacing  Knife spacing for different geographic soil types, conditions and moistur  Seed to soil contact  Knives create a slit, the seed is precisely placed in the slit and the roller to soil contact (for better seed germination).  Easy seed cup and seed box emptying  Seed box agitator  Seed cups with powder metal flutes  Gauge wheel or rear roller seed cup drive  Water tight seed box  Wind guarded seed drop  Straight Knives  Curved Knives  Curved Knives  Simultaneously seeds second type of seed.  Slit seeder attachment  Guides seed directly into slit. Good for overseeding expensive grasses to to soil contact.  Front roller (Option)  Weffset hitch – 48" unit  Knives create a slit, the seed is precisely placed in the slit and the roller to soil tifferent geographic soil types, conditions and moistur Knives create a slit, the seed is precisely placed in the slit and the roller to soil contact.  Front roller (Option)  Knives create a slit, the seed is precisely placed in the slit and the roller to soil content.  Knives create a slit, the seed is precisely placed in the slit and the roller soil contact.  Front roller (Option)  Knives create a slit, the seed is precisely placed in the slit and the roller does not as seed by peach flute. Powder metal dissipates hear running cool.  Superior metering accuracy by each flute. Powder metal dissipates hear running cool.  Gauge wheels keeps knives in ground more consistently in undulating to drive allows for closer seeding to obstructions.  Keeps water out and seeds in.  Seed rate is consistent across width of the machine and is not hampere conditions.  Straight Knives  More aggressive, picks up thatch.  Curved Knives  Simultaneously seeds second type of seed.  Slit seeder attachment  Guides seed directly into slit. Good for overseeding expensive grasses to to soil contact.  Front roller (Option)  Used to set seeding depth with units equipped with rear roller drive. Precise of the process of	e.
to soil contact (for better seed germination).  Easy seed cup and seed box emptying  Seed box agitator  Seed cups with powder metal flutes  Gauge wheel or rear roller seed cup drive  Water tight seed box  Straight Knives  Curved Knives  Small seeds box  Slit seeder attachment  To seed cup swith powder metal flutes  Curved (Option)  Less aggressive and less disturbance of thatch layer.  Small seeds box  Used to set seeding depth with units equipped with rear roller drive. Presence of the powder of the powder of the powder metal dissipates hear running cool.  Straight (Find the powder metal dissipates hear running cool.  Gauge wheels keeps knives in ground more consistently in undulating to drive allows for closer seeding to obstructions.  Keeps water out and seeds in.  Seed rate is consistent across width of the machine and is not hampere conditions.  Straight Knives  More aggressive, picks up thatch.  Curved Knives  Less aggressive and less disturbance of thatch layer.  Small seeds box  Simultaneously seeds second type of seed.  Slit seeder attachment  Guides seed directly into slit. Good for overseeding expensive grasses to soil contact.  Front roller (Option)  Used to set seeding depth with units equipped with rear roller drive. Preserving widths  48", 72"  HP rating	
Seed box agitator  Seed cups with powder metal flutes  Gauge wheel or rear roller seed cup drive  Wind guarded seed drop  Straight Knives  Curved Knives  Straight Knives  Straight Seeds box  Simultaneously seeds second type of seed.  Slit seeder attachment  Guides seed directly into slit. Good for overseeding expensive grasses to to soil contact.  Front roller (Option)  Less aggressive and less dispurped with rear roller drive. Preference with powder metal dissipates hear running accuracy by each flute. Powder metal dissipates hear running cool.  Superior metering accuracy by each flute. Powder metal dissipates hear running cool.  Gauge wheels keeps knives in ground more consistently in undulating to drive allows for closer seeding to obstructions.  Keeps water out and seeds in.  Seed rate is consistent across width of the machine and is not hampere conditions.  Straight Knives  More aggressive, picks up thatch.  Less aggressive and less disturbance of thatch layer.  Small seeds box  Simultaneously seeds second type of seed.  Slit seeder attachment  Guides seed directly into slit. Good for overseeding expensive grasses to to soil contact.  Front roller (Option)  Used to set seeding depth with units equipped with rear roller drive. Preference with the powder metal dissipates hear running accuracy by each flute. Powder metal dissipates hear running accuracy by each flute. Powder metal dissipates hear running cool.  Seed running cool.  Seed run in ground more consistently in undulating to drive accuracy by each flute. Powder metal dissipates hear running cool.  Seed run in ground more consistent across width of the machine and is not hampere conditions.	incorporates seed
Seed cups with powder metal flutes  Gauge wheel or rear roller seed cup drive  Water tight seed box  Wind guarded seed drop  Straight Knives  Curved Knives  Small seeds box  Simultaneously seeds second type of seed.  Slit seeder attachment  Gauge sheels keeps knives in ground more consistently in undulating to drive allows for closer seeding to obstructions.  Wind guarded seed drop  Seed rate is consistent across width of the machine and is not hampere conditions.  Straight Knives  More aggressive, picks up thatch.  Curved Knives  Less aggressive and less disturbance of thatch layer.  Small seeds box  Simultaneously seeds second type of seed.  Slit seeder attachment  Guides seed directly into slit. Good for overseeding expensive grasses to to soil contact.  Front roller (Option)  Used to set seeding depth with units equipped with rear roller drive. Pred  Working widths  48", 72"  HP rating  25-60 HP	ed flutes.

HP rating 25-60 HP	cise depth control.
-	
Officet hitch 40" unit Officet by 40" to cover right tire treely	
Offset hitch – 48" unit  Offset by 10" to cover right tire track.	
Fits Land Pride Aids in one person hook-up.  Quick-Hitch	
<b>Machine weights</b> 48" - 1260 lbs; 72" - 1605 lbs.	
<b>0"-1 1/2" Depth adjustment</b> Adjust depth for different seed types, soil conditions and moisture.	
High carbon heat-treated knives Last longer in sandy soils.	
High tensile roller chain Provides a smooth and quiet drive.	
1 Bushel per foot seedbox Fill less often with a large box.	
Seed splash guard Seedbox lid has a guard to prevent seed from being spilled between lid	and box.
Heavy-duty lid Lid won't buckle or slam shut in high winds.	
Lift hooks Allow for easy loading & unloading from trailers	
Packer wheel scraper Prevents soil buildup on packer wheels in moist conditions.	
Covered drive chains  Drive chains are covered for safety, as well as keeping tree branches avec chain jumping.	vay to eliminate
Warranty 5 Years on gearbox. One year parts & labor.
