

Rotary Cutters, Folding Deck

RC(M)5515 & RC(M)6515 Models

industry standards testing procedures specified by ANSI. Factory assembled Saves customer set-up time and money. 7 Year gearbox warranty* Shows confidence in gearbox integrity. Gearbox Seal Protection Gearbox bottom seal protection for longer bearing life. 250 HP Divider gearbox A rugged heavy built gearboxes capable of handling heavy cutting applications. 210 HP center & wing gearboxes Protection 23/8" Output gearbox shaft Large output shaft handles shock loads better. Input driveline: Cat. 5 CV Holds up to shock loads and harsh mowing conditions. Cat. 5 intermediate & Cat. 4 wing driveline is sized right for the intended cutting capacity. Slip-clutch will slip under load instead of twisting the driveline. Star profile drive shafts Star profile spreads load out to many points on the shaft. More apt to resist bending and twisting under shock loads and harsh mowing conditions. Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. 4 Plate slip-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline when impacts are encountered. High blade tip speed Can cut brushy areas with saplings up to 4". Gare out brushy areas with saplings up to 4 1/2". Can cut brushy areas with saplings up to 4 1/2". Pre-cut chamber Allo	Features	Benefits
Factory assembled Saves customer set-up time and money. 7 Vear garbox warranty* Shows confidence in gearbox integrity. 230 IP Divider gearbox A rugged heavy built gearboxes capable of handling heavy cutting applications. 21 UP center & wing gearbox shaft Large output shaft handles shock loads better. Input drivelines Factory built gearboxes capable of handling heavy cutting applications. 21 Br center & wing gearbox shaft Large output shaft handles shock loads and harsh mowing conditions. Cat. 5 Intermediate & Cat. 4 wing drivelines with slip-clutch will slip under load furbiling the driveline. Driveline is sized right for the intended outling capacity. Slip-clutch will slip under load furbiling the driveline. Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. Easy Greasable drivelines Drivelines and gearboxes by slipping clutches rather than twisting the driveline when impacts are concutered. High blade tip speed Allows clean cut may areas with saplings up to 4'. 65 Series Can cut brushy areas with saplings up to 4'. 65 Series Can cut brushy areas with saplings up to 4'. 65 Series Can cut brushy areas with saplings up to 4'. 65 Series Can cut brushy areas with saplings up to 4'. 7 bock height	Surpassed rugged	All Land Pride Cutters have been designed and tested and meet rigorous voluntary
7 Year gearbox warranty* Shows confidence in gearbox integrity. 250 HP Divider gearbox A rugged heavy built gearboxes capable of handling heavy cutting applications. 210 HP center & wing gearboxes A rugged heavy built gearboxes capable of handling heavy cutting applications. 210 HP center & wing gearbox shaft Large output shaft handles shock loads better. 210 HP center & wing gearbox shaft Large output shaft handles shock loads better. 210 HP center & wing gearbox shaft Large output shaft handles shock loads better. 210 HP center & wing gearbox shaft Large output shaft handles shock loads and harsh mowing conditions. 211 HP center & wing gearbox shaft Large output shaft for the intended cutting capacity. Silp-clutch will silp under load it many points on the shaft. More apt to resist bending and twisting under shock loads and harsh mowing conditions. Star profile greads Cas do ut to many points on the shaft. More apt to resist bending and twisting under shock loads and harsh mowing coultions and to grease the inner profiles. 4 Plate slip-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline. 5 Blade coverlap Elliminates skipping during turns. High cutting capacity to 5 Series Can out brusby areas with sagings up to 4 1/2". 2" to 14" Cutting height Covers a wide range of material. Picks up tractor tracks.	industry standards	testing procedures specified by ANSI.
Gearbox Seal Protection Cearbox bottom seal protection for longer bearing life. 250 HP Divider gearbox A rugged heavy built gearboxes capable of handling heavy cutting applications. 2 NB" Output gearbox shaft Large output shaft handles shock loads better. Tiput drivelines Driveline is sized right for the intended cutting capacity. Slip-clutch will slip under load introl the shaft. More apt to resist bending and trivelines with slip-clutch will slip under load introl the shaft. More apt to resist bending and trivelines with slip-clutch Star profile drive shafts Star profile spreads load out to many points on the shaft. More apt to resist bending and twisting under shock loads and harsh mowing conditions. Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. 4 Plate slip-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline when impacts are encountered. High dutting capacity 55 Series Can cut brushy areas with saplings up to 4". Can cut brushy areas with saplings up to 4 1/2". Can cut brushy areas of material. Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 27 to 14" cutting height Can eut brushy areas of material. Picks up tractor tracks. 27 to 14" cutting height Can eut brushy areas of the sapling sup to 4.1/2".	Factory assembled	Saves customer set-up time and money.
250 HP Divider gearbox A rugged heavy built gearboxes capable of handling heavy cutting applications. 210 HP center & wing gearboxes Large output shaft handles shock loads better. 10 HP center & wing gearboxes Large output shaft handles shock loads better. 2.36" Output gearbox shaft Large output shaft handles shock loads and harsh mowing conditions. 2.51 termendiate & Cat. 4 wing drivelines with slip-clutches Star profile grices load out to many points on the shaft. More apt to resist bending and twisting under shock loads and harsh mowing conditions. Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. Plate slip-clutch Profile spreads and gearboxes by slipping clutches rather than twisting the driveline when impacts are encountered. High blade tip speed (See Speeific cations for actual FPM) Eliminates skipping during turns. Flee slip-clutch Star cut brushy areas with saplings up to 4". Can cut brushy areas with saplings up to 4 1/2". Pre-cut chamber Allows grass and yeaptower of material. Profile spreads Easy Greasable drivelines. 210 14" Cutting height Covers a wide range of cutting conditions. 7 to 14" Cutting height Covers a wide range of cutting conditions. 7 to 14" Cutting height Covers a wide range of cutting conditions. 7 Gauge smooth dec	7 Year gearbox warranty*	Shows confidence in gearbox integrity.
210 HP center & wing gearboxses Image agerbox shaft Large output shaft handles shock loads better. Input driveline: Cat. 5 CV Holds up to shock loads and harsh mowing conditions. Cat. 5 Intermediate & Cat. 4 wing Driveline is sized right for the intended cutting capacity. Slip-clutch will slip under load divelines with slip-clutches Star profile drive shafts Star profile spreads load out to many points on the shaft. More apt to resist bending and twisting under shock loads and harsh mowing conditions. Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. 4 Plate slip-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline when impacts are encountered. Allows clean outting of material. Scee Specifications for actual FPM 6* Blade overlap Eliminates skipping during turns. High outting capacity 55 Series Can cut brushy areas with saplings up to 4*. Can cut brushy areas with sapling up of cut material under the deck. Leff wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2* to 14* Cutting height Covers a wide range of cutting conditions. 12* Deck height Handles heavy cutting rot actor tracks. 2* to 14* Cutting height Covers a wide range of cutting conditions. 10 gauge sm	Gearbox Seal Protection

Cat. 5 intermediate & Cat. 4 wing drivelines with slip-clutches Driveline is sized right for the intended cutting capacity. Slip-clutch will slip under load instead of twisting the driveline. Star profile drive shafts Star profile spreads load out to many points on the shaft. More apt to resist bending and twisting under shock loads and harsh mowing conditions. Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. 4 Plate slip-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline when impacts are encountered. 4 Plate slip-clutch Protects driveling of material. (See Specifications for actual FPM) Eliminates skipping during turns. 6 Blade overlap Eliminates skipping during turns. High cutting capacity 55 Series 65 Series Can cut brushy areas with saplings up to 4*1/2". Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 13" deg gesmooth deck top Reduces design holds up to harsh conditions. No bottom obstructions.	2 3/8" Output gearbox shaft	Large output shaft handles shock loads better.
drivelines with silp-clutches instead of wisting the driveline. Star profile drive shafts Star profile spreads load out to many points on the shaft. More apt to resist bending and twisting under shock loads and harsh mowing conditions. Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. A Plate silp-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline. Wigh Bade tip speed Allows clean cutting of material. Gee Specifications for actual FPM) Eliminates skipping during turns. 6" Blade overlap Eliminates skipping during turns. High cutting capacity 55 Series Can cut brushy areas with saplings up to 4 *1/2". 2" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. Laft wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Charout brushy areage of cutting conditions. 1" thick mounting bar Can cut brushy areas the sapling sup to 4 *1/2". 10 gauge smooth deck top Reduces design holds up to harsh conditions. No botm obstructions. 7 Gauge smooth deck bottom Reduces design holds up to harsh conditions. No botm obstructions. 8 Bif-leveling hitch Reduces darbar wear by keeping hitch	Input driveline: Cat. 5 CV	Holds up to shock loads and harsh mowing conditions.
Star profile drive shafts Star profile spreads load out to many points on the shaft. More apt to resist bending and twisting under shock loads and harsh mowing conditions. Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. 4 Plate slip-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline when impacts are encountered. High blade tip speed Allows clean cutting of material. Ge Blade overlap Eliminates skipping during turns. High cutting capacity 55 Series Can cut brushy areas with saplings up to 4*. Can cut brushy areas with saplings up to 4 1/2". Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Handles heavy cutting, which reduces balling-up of cut material under the deck. Jage smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck botom Heavy found stump jumper with bottom gearbox seal protector. Can hold up to tough drive thile going through ditches. High wing sections Allow you to shape the cutter to the job. Ideal for rough ground where hil	Cat. 5 intermediate & Cat. 4 wing	Driveline is sized right for the intended cutting capacity. Slip-clutch will slip under load
Invisting under shock loads and harsh mowing conditions. Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. 4 Plate slip-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline when impacts are encountered. Kigh blade tip speed Allows clean cutting of material. 6* Blade overlap Eliminates skipping during turns. Figh cutting capacity 55 Series 65 Series Can cut brushy areas with saplings up to 4*. 72* Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. 12* Tock height Handles heavy cutting, which reduces balling-up of cut material under the deck. 13* flow stump jumper backed with a 1* thick mounting bar Covers a wide range of cutting conditions. 10* gauge smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck top Reduces debris piering possibilities. Can be replaced if damaged. Reversible/replaceable skid shoes Can be reversed for extended life and replaced when damaged or worn out. Self-leveling hitch Reduces drawbar wear by keeping hitch level while going through divides. 18* solid hinge rods Allow you to shape the cutter to the job. Ideal for rough ground where hillsides	drivelines with slip-clutches	instead of twisting the driveline.
Easy Greasable drivelines Drivelines have access holes for greasing the U-joints and to grease the inner profiles. 4 Plate slip-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline when impacts are encountered. High blade tip speed Allows clean cutting of material. (See Specifications for actual FPM) Eliminates skipping during turns. Bigh cutting capacity 55 Series Can cut brushy areas with saplings up to 4 1/2". Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Eleter discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 7 dague smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck totom Reduces design holds up to harsh conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces design holds up to harsh conditions. No bottom obstructions. Replaceable first wing sidewall Reduces design holds up to harsh conditions. Replaceable first wing sidewall Reduces design holds up to harsh conditions. Replaceable fi	Star profile drive shafts	Star profile spreads load out to many points on the shaft. More apt to resist bending and
4 Plate slip-clutch Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline when impacts are encountered. High blade tip speed Allows clean cutting of material. (See Specifications for actual FPM) Eliminates skipping during turns. 6" Blade overlap Eliminates skipping during turns. High cutting capacity 55 Series 7 Per-cut chamber Allows clean cutting of material. 12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 10 gauge smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions. Refleveling hitch Reduces drawbar wear by keeping hitch level while going through ditches. Hinge wing sections Allow you to shape the cuttler to hejob. Ideal for rough ground where hillides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Larger diameter hinge rod gives greater strength to the cutter from front to rear, and in the hinge area itself. Wing transport locks Holds transport wings in the folded-up position in case of hydraulic pressure loss. <th></th> <th>twisting under shock loads and harsh mowing conditions.</th>		twisting under shock loads and harsh mowing conditions.
when impacts are encountered. High blade tip speed (See Specifications for actual FPM) 6" Blade overlap Eliminates skipping during turns. High cutting capacity 55 Series (S series) Can cut brushy areas with saplings up to 4 1/2". Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. 124" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a "thick mounting bar Reduces decirp possibilities. Can be replaced if damaged. Replaceable 1/4" wing sidewall Reduces drabins picering possibilities. Can be replaced if damaged. Reversible/replaceable skid shoes Cane true represent to the folded-up possibilities. Can be cutter to the jo. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Holds transport ings in the folded-up position in case of hydraulic pressure loss. Enclosed from to rear dual leveling rods Set hubs makes the wheel assembly more durable and longer lasting. Protects unit from bumps and ground shock. Protects unit from bumps and ground shock. Reduces drawbar wear by keeping hitch level wing word where hillsides, ditches and hollows can cause uneven cutting. when impacts are encountered. High blade tip speed (See Specifications for actual FPM) 6" Blade overlap Eliminates skipping during turns. High cutting capacity 55 Series (S series) Can cut brushy areas with saplings up to 4 1/2". Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. 124" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a "thick mounting bar Reduces decirp possibilities. Can be replaced if damaged. Replaceable 1/4" wing sidewall Reduces drabins picering possibilities. Can be replaced if damaged. Reversible/replaceable skid shoes Cane true represent to the folded-up possibilities. Can be cutter to the jo. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Holds transport ings in the folded-up position in case of hydraulic pressure loss. Enclosed from to rear dual leveling rods Set hubs makes the wheel assembly more durable and longer lasting. Protects unit from bumps and ground shock. Protects unit from bumps and ground shock. Reduces drawbar wear by keeping hitch level wing word where hillsides, ditches and hollows can cause uneven cutting. Protectar, and	4 Plate slip-clutch	Protects drivelines and gearboxes by slipping clutches rather than twisting the driveline
(See Specifications for actual FPM) Eliminates skipping during turns. 6" Blade overlap Eliminates skipping during turns. High cutting capacity 55 Series Can cut brushy areas with saplings up to 4". Can cut brushy areas with saplings up to 4 1/2". Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Dock height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a Heavy round stump jumper with bottom gearbox seal protector. Can hold up to tough conditions. 7 to 14" Cutting height Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck top Reduces design holds up to hark conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces drawbar wear by keeping hitch level while going through ditches. Hingd wing sections Allow you to shape the cutter to the job. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Holds transport wings in the folded-up position in case of hydraulic pressure loss. Enclosed front to rear dual leveling Selb tubs makes	-	
(See Specifications for actual FPM) Eliminates skipping during turns. 6" Blade overlap Eliminates skipping during turns. High cutting capacity 55 Series Can cut brushy areas with saplings up to 4". Can cut brushy areas with saplings up to 4 1/2". Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Dock height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a Heavy round stump jumper with bottom gearbox seal protector. Can hold up to tough conditions. 7 to 14" Cutting height Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck top Reduces design holds up to hark conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces drawbar wear by keeping hitch level while going through ditches. Hingd wing sections Allow you to shape the cutter to the job. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Holds transport wings in the folded-up position in case of hydraulic pressure loss. Enclosed front to rear dual leveling Selb tubs makes	High blade tip speed	Allows clean cutting of material.
High cutting capacity 55 Series Can cut brushy areas with saplings up to 4". Can cut brushy areas with saplings up to 4 1/2". Can cut brushy areas with saplings up to 4 1/2". Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a Heavy round stump jumper with bottom gearbox seal protector. Can hold up to tough conditions. 10 gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces decimation of debris and is easier and faster to clean. 7 Gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces drawbar wear by keeping hitch level while going through ditches. Bifleveling hitch Reduces drawbar wear by keeping hitch level while going through ditches. 41 stansport locks Holds transport wings in the folded-up position in case of hydraulic pressure loss. Enclosed front to rear dual leveling 5-Bolt hubs makes the wheel assembly more durable and longer lastin	(See Specifications for actual FPM)	
65 Series Can cut brushy areas with saplings up to 4 1/2". Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a Heavy round stump jumper with bottom gearbox seal protector. Can hold up to tough 1" thick mounting bar conditions. 10 gauge smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces drawbar wear by keeping hitch level while going through ditches. Ringed wing sections Allow you to shape the Cuttler to the job. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Larger diameter hinge rod gives greater strength to the Cuttler from front to rear, and in the hinge area itself. Wing transport locks Folds transport wings in the folded-up position in case of hydraulic pressure loss. Enclosed front to rear dual leveling rods enable the cuttler to pull equally on the rear axle during travel over rough terrain. Many competitors only use one leveling rod.	6" Blade overlap	Eliminates skipping during turns.
Pre-cut chamber Allows grass and vegetation to stand back up prior to cutting for a more complete cut. 12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a Heavy round stump jumper with bottom gearbox seal protector. Can hold up to tough conditions. 10 gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces debris piercing possibilities. Can be replaced if damaged. Reversible/replaceable skid shoes Can be reversed for extended life and replaced when damaged or worn out. Self-leveling hitch Reduces drawbar wear by keeping hitch level while going through ditches. Hinged wing sections Allow you to shape the cutter to the job. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Larger diameter hinge rod gives greater strength to the cutter from front to rear, and in the hinge area itself. Wing transport locks Holds transport wings in the folded-up position in case of hydraulic pressure loss. Dual leveling rods enable the cutter to the idoled-up wings. Heleys prevent paint deterioration and rusing to the wheel rims.	High cutting capacity 55 Series	Can cut brushy areas with saplings up to 4".
12" Deck height Handles heavy cutting, which reduces balling-up of cut material under the deck. Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a 1" thick mounting bar Heavy round stump jumper with bottom gearbox seal protector. Can hold up to tough conditions. 10 gauge smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructons. Replaceable 1/4" wing sidewall Reduces debris piercing possibilities. Can be replaced if damaged. Reversible/replaceable skid shoes Can be reversed for extended life and replaced when damaged or worn out. Self-leveling hitch Reduces drawbar wear by keeping hitch level while going through ditches. Hinged wing sections Allow you to shape the cutter to the job. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Larger diameter hinge rod gives greater strength to the cutter from front to rear, and in the hinge area itself. Wing transport locks Holds transport wings in the folded-up position in case of hydraulic pressure loss. Drain holes in wheel rims S-Bolt hubs makes the wheel assembly more durable and longer lasting. String-reush	65 Series	Can cut brushy areas with saplings up to 4 1/2".
Left wing rotates clockwise Better discharge of material. Picks up tractor tracks. 2" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a Heavy round stump jumper with bottom gearbox seal protector. Can hold up to tough trittic mounting bar 10 gauge smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces debris piercing possibilities. Can be replaced when damaged or worn out. Self-leveling hitch Reduces drawbar wear by keeping hitch level while going through ditches. Hinged wing sections Allow you to shape the Cutter to the job. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Larger diameter hinge rod gives greater strength to the Cutter from front to rear, and in the hinge area itself. Wing transport locks Holds transport wings in the folded-up position in case of hydraulic pressure loss. Dual leveling rods 5-Bolt hubs 5-Bolt hubs 5-Bolt hubs makes the wheel assembly more durable and longer lasting. Drain holes in wheel rims Allows water to drain from wheels mounted on folded-up wings. Helps prevent paint deterioration and rusting to the wheel rims. Spring-cushioned center-axle	Pre-cut chamber	Allows grass and vegetation to stand back up prior to cutting for a more complete cut.
2" to 14" Cutting height Covers a wide range of cutting conditions. 3/16" Stump jumper backed with a Covers a wide range of cutting conditions. 1" thick mounting bar Heavy round stump jumper with bottom gearbox seal protector. Can hold up to tough conditions. 10 gauge smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces debris piercing possibilities. Can be replaced if damaged. Reversible/replaceable skid shoes Can be reversed for extended life and replaced when damaged or worn out. Self-leveling hitch Reduces drawbar wear by keeping hitch level while going through ditches. Hinged wing sections Allow you to shape the cutter to the job. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Larger diameter hinge rod gives greater strength to the cutter from front to rear, and in the hinge area itself. Wing transport locks Holds transport wings in the folded-up position in case of hydraulic pressure loss. Enclosed front to rear dual leveling Dual leveling rods enable the cutter to pull equally on the rear axle during travel over rough terrain. Many competitors only use one leveling rod. 5-Bolt hubs 5-Bolt hubs makes the wheel assembly more durable and longer lasting. <	12" Deck height	Handles heavy cutting, which reduces balling-up of cut material under the deck.
3/16" Stump jumper backed with a Heavy round stump jumper with bottom gearbox seal protector. Can hold up to tough conditions. 10 gauge smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces debris piercing possibilities. Can be replaced if damaged. Reversible/replaceable skid shoes Can be reversed for extended life and replaced when damaged or worn out. Self-leveling hitch Reduces drawbar wear by keeping hitch level while going through ditches. Hinged wing sections Allow you to shape the cutter to the job. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cutting. 1" Solid hinge rods Larger diameter hinge rod gives greater strength to the Cutter from front to rear, and in the hinge area itself. Wing transport locks Holds transport wings in the folded-up position in case of hydraulic pressure loss. Drain holes in wheel rims 5-Bolt hubs makes the wheel assembly more durable and longer lasting. Spring-cushioned center-axle Protects unit from bumps and ground shock. Replaceable wheel spindles Wheel spindles can be replaced when damaged spindle. Double swivel hitch option Great for uneven terrain, reduces drawbar wear. Bar-tite hitch option Great for uneven	Left wing rotates clockwise	Better discharge of material. Picks up tractor tracks.
1" thick mounting bar conditions. 10 gauge smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions. Replaceable 1/4" wing sidewall Reduces debris piercing possibilities. Can be replaced if damaged. Reversible/replaceable skid shoes Can be reversed for extended life and replaced when damaged or worn out. Self-leveling hitch Reduces drawbar wear by keeping hitch level while going through ditches. Hinged wing sections Allow you to shape the Cutter to the job. Ideal for rough ground where hillsides, ditches and hollows can cause uneven cuting. 1" Solid hinge rods Larger diameter hinge rod gives greater strength to the Cutter from front to rear, and in the hinge area itself. Wing transport locks Holds transport wings in the folded-up position in case of hydraulic pressure loss. Enclosed front to rear dual leveling Dual leveling rods enable the cutter to pull equally on the rear axle during travel over rough terrain. Many competitors only use one leveling rod. 5-Bolt hubs 5-Bolt hubs makes the wheel assembly more durable and longer lasting. Drain holes in wheel rims Allows water to drain from wheels mounted on folded-up wings. Helps prevent paint deterioration and rusting to the wheel rims. Spring-cushioned center-axle Protects unit from bu	2" to 14" Cutting height	Covers a wide range of cutting conditions.
10 gauge smooth deck top Reduces accumulation of debris and is easier and faster to clean. 7 Gauge smooth deck bottom Heavy deck design holds up to harsh conditions. No bottom obstructions.
